03/11/2025 – 10/12/2025

Food Community Web Application (Next.js Full Stack)

Developed a full-stack food community platform using Next.js, SQLite, CSS, and JavaScript. Implemented features such as Browse Meals and Foodie Community, enabling users to upload and share meal images with descriptions. Built custom API routes for server-side data handling and optimized performance through SSR (Server-Side Rendering) and SSG (Static Site Generation).

20/12/2025 – 25/01/2026

Newspaper Archive Website (Next.js Full Stack)

Built a dynamic newspaper web application using Next.js, SQLite, CSS, and JavaScript. Implemented features to browse latest news and filter by date, allowing users to select a specific year and month to view archived news. Leveraged Next.js API routes for data management and improved performance with SSR and SSG rendering techniques.
